

# GEO-TRACK CLIP

## RAIL ROAD PRISM MOUNTING DEVICE

### Applications:

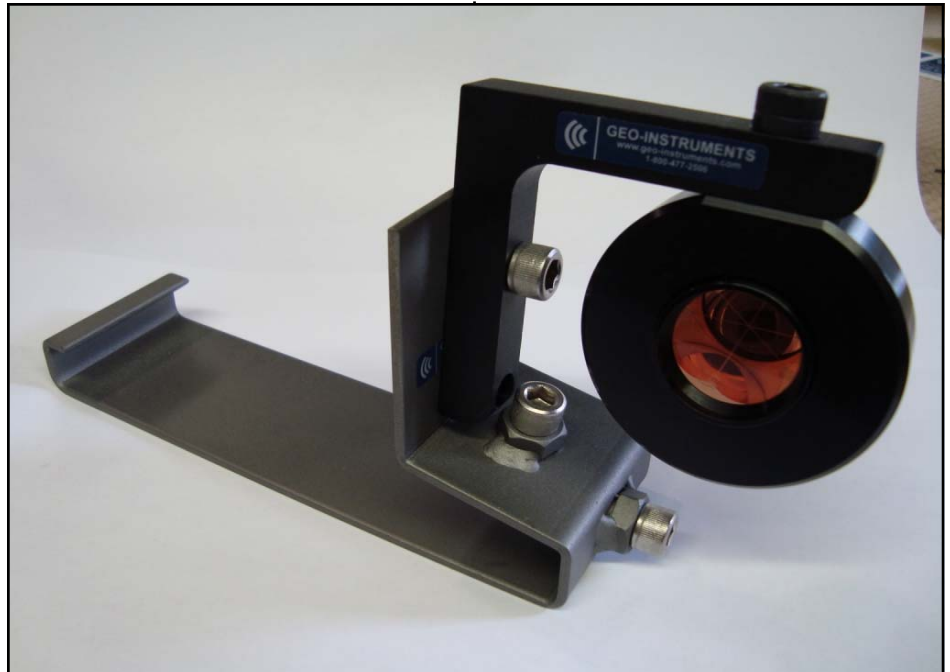

- Mounts Geo-Instruments Mini Prisms on Rail Road Track Flange.
- Used with AMTS systems to monitor track twist and settlement.

### Description:

The GEO-TRACK CLIP consists of a custom formed steel clip with stainless steel socket cap screws. The Track Clip fits on to common 6" rail.

The track clip is fastened to rail with 1/4"-20 SS screws to provide positive connection to rail.

Below: Track Clip without prism mounted.

Above: Track Clip and Geo-Instruments 25.4 mini prism

Designed for easy attachment of Geo-Instruments Mini Prisms, mounted directly with 1/4"-20 hardware (supplied).

### Features:

- Shock resistant and rugged construction.
- Designed for long term use, active track.
- Allows fast installation in limited track possessions.
- No need to drill, weld, or modify existing rail.
- Available from stock.
- Field installable
