

ROCK SOLID, FIELD READY

How Buying an Ultra-Rugged Archer Field PC® Makes You Ultra-Smart

Yes, a PDA is inexpensive. But is that the best reason to buy a consumer-grade PDA when you could invest a little more in the Archer Field PC, a device that stands up to the elements? Consider this:

You can stay in the field

The Archer Field PC provides battery charge for up to 20 hours, much longer than the average PDA battery charge.

Losing data is costly

Think about the cost of labor for a day. If you lose your data because your PDA stops working, you lose the cost of your labor, plus you have to purchase a new PDA. The Archer Field PC is ultra-rugged, meaning you can be sure your information is safe.

It's made to endure

With an IP67 sealed rating, the Archer Field PC is completely sealed against dust and water. Rain, sleet, snow... the Archer Field PC braves it all!

Expands to hold peripheral devices

Install a GPS card, Wi-Fi card, or another SD or CF card device. Our extended caps for the Archer provide a seal against water and dust, so you know your peripheral device is safe.

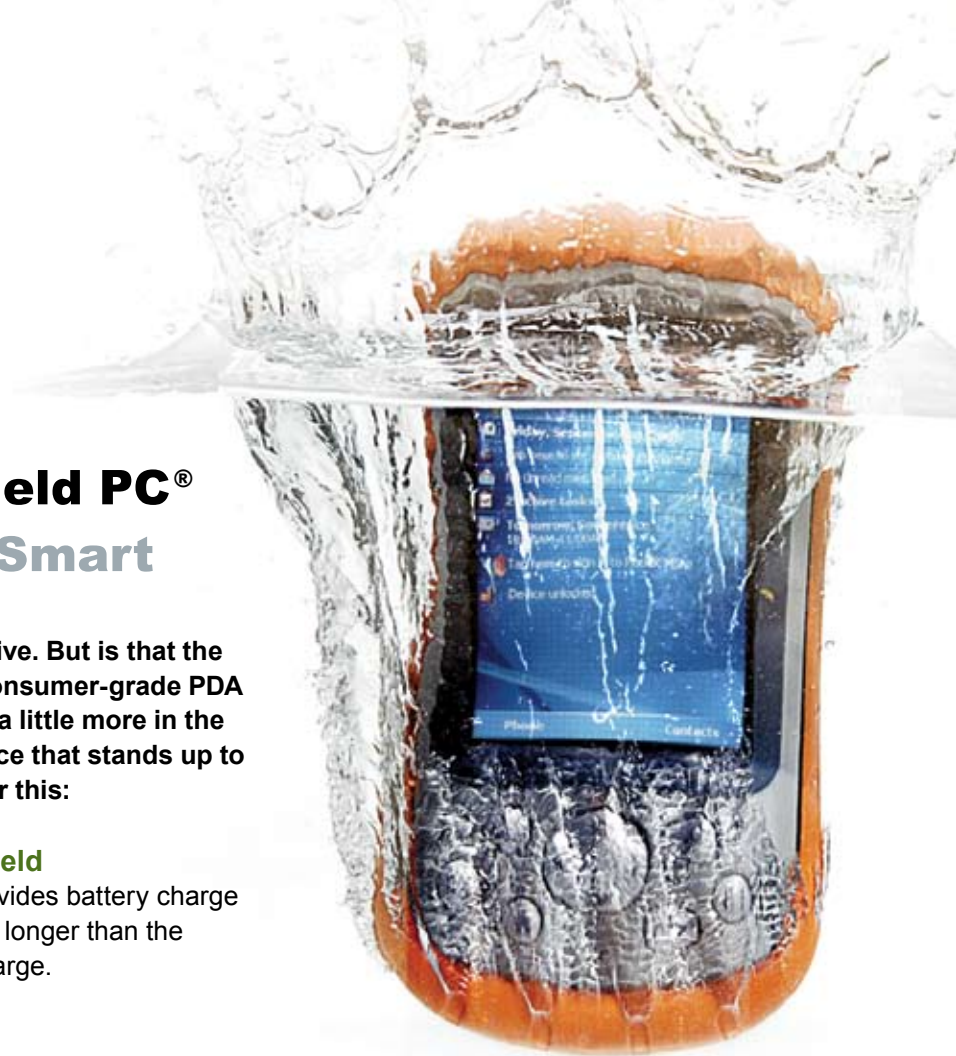

Built to withstand extremes

PDA's may break down or fail in extreme temperatures. The Archer Field PC is made to operate in temperatures as cold as -22°F (-30°C) or as hot as 122°F (50°C).

WITHSTANDS the ELEMENTS

- Dust
- Sand
- Water
- Sleet
- Snow
- Heat

You may flinch, but you won't cry

When you drop our Archer Field PC, you'll find that it's still ready to use. When you drop a consumer-grade PDA, you'll be picking up pieces.

You get what you pay for

PDA's do not have robust connectors, so it's easy to lose an electrical connection or damage the device. Trust the strong connectors of the Archer Field PC.

Use it outdoors

Tired of struggling to see your PDA outside? With the Archer Field PC, the screen is more readable in direct sunlight.

Customer support

No need to wade through phone directory options. When you call us for help, you'll talk to a real person.

We've given you our reasons for buying the Archer Field PC. Why not buy one and discover reasons of your own?
